orenziv@dalit.org.il

Medical Workforce Unit

Deputy Director of the hospital, Dr. Dror Dolphin, is responsible for medical workforce: identification, recruitment, retention, and professional and personal development.

Dr. Naama Steier

Professional and Personal Development

Innovation system, one of the leading research centers in Israel with an active research room, mentorship programs, and fellowship support in collaboration with Ben-Gurion University.

Medical and Managerial Leadership

Clalit Health Services offers management and leadership programs, and the hospital also operates local programs.

Research

The hospital collaborates with the university and industry, including Gav-Yam, in the fields of research and development as well as entrepreneurship.

Innovation

An active Innovation Unit works in collaboration with the university and industry, including Gav-Yam. The unit offers workshops and programs for accelerating innovation, developing solutions, and advancing initiatives that emerge from the field.

Staff Well-Being

The Resilience Unit invests significant resources in staff well-being. Support groups are available for residents in their first years of residency, alongside resilience days, workshops, and team-building activities. A large professional team provides personal support, consulting, guidance, and conversations.

Guidance and Support for New Physicians

A structured onboarding process, orientation tours for new employees, and development of an organized residency plan.

Academia and Medical Education

Ongoing collaboration, including clinical teaching, academic teaching, and research support. A Medical Education Unit supports physicians throughout all stages of their professional journey, from medical student to senior physician.

Scholarships and Incentives

The Kohavim Program, Ministry of Health.

Future Opportunities

The hospital is undergoing extensive development, including the establishment and expansion of new services. Planned developments include a new neonatal intensive care unit, expansion of operating rooms, and transition to a large and advanced emergency department.

In-Demand Specialties

Neurology, internal medicine, pediatrics, gynecology, oncology.
